# Tropical Nursery Manual

## A Guide to Starting and Operating a Nursery for Native and Traditional Plants

**Kim M. Wilkinson • Thomas D. Landis • Diane L. Haase  
Brian F. Daley • R. Kasten Dumroese**  
EDITORS

Forest Service • Agriculture Handbook XXX • March 2014

The use of trade or firm names in this publication is for reader information and does not imply endorsement by the Forest Service, U.S. Department of Agriculture of any product or service.

Pesticides used improperly can be injurious to humans, animals, and plants. Follow the directions and heed all precautions on the labels. Store pesticides in original containers under lock and key—out of the reach of children and animals—and away from food and feed. Apply pesticides so that they do not endanger humans, livestock, crops, beneficial insects, fish, and wildlife. Do not apply pesticides when there is danger of drift, when honey bees or other pollinating insects are visiting plants, or in ways that may contaminate water or leave illegal residues. Avoid prolonged inhalation of pesticide sprays or dusts; wear protective clothing and equipment if specified on the container. If your hands become contaminated with a pesticide, do not eat or drink until you have washed. In case a pesticide is swallowed or gets in the eyes, follow the first-aid treatment given on the label, and get prompt medical attention. If a pesticide is spilled on your skin or clothing, remove clothing immediately and wash skin thoroughly. Do not clean spray equipment or dump excess spray material near ponds, streams, or wells. Because it is difficult to remove all traces of herbicides from equipment, do not use the same equipment for insecticides or fungicides that you use for herbicides. Dispose of empty pesticide containers promptly. Have them buried at a sanitary landfill dump, or crush and bury them in a level, isolated place.

NOTE: Some States have restrictions on the use of certain pesticides. Check your State and local regulations. Also, because registrations of pesticides are under constant review by the Federal Environmental Protection Agency, consult your county agricultural agent or State extension specialist to be sure the intended use is still registered.

The U.S. Department of Agriculture (USDA) prohibits discrimination in all its programs and activities on the basis of race, color, national origin, age, disability, and where applicable, sex, marital status, familial status, parental status, religion, sexual orientation, genetic information, political beliefs, reprisal, or because all or part of an individual's income is derived from any public assistance program. (Not all prohibited bases apply to all programs.) Persons with disabilities who require alternative means for communication of program information (Braille, large print, audiotape, etc.) should contact USDA's TARGET Center at (202) 720-2600 (voice and TDD). To file a complaint of discrimination, write USDA, Director, Office of Civil Rights, 1400 Independence Avenue, S.W., Washington, D.C. 20250-9410, or call (800) 795-3272 (voice) or (202) 720-6382 (TDD). USDA is an equal opportunity provider and employer.

Nomenclature for scientific names follows the U.S. Department of Agriculture, Natural Resources Conservation Service PLANTS (Plant List of Accepted Nomenclature, Taxonomy, and Symbols) database (2008). <http://plants.usda.gov>

# CONTENTS

## Getting Started

<b>1. Why Start a Tropical Nursery for Native and Traditional Plants?</b> .....	17
<i>Kim M. Wilkinson and Brian F. Daley</i>	
The Environmental and Social Context in the U.S. Affiliated Tropical Islands .....	20
Why Grow Native Plants? .....	22
Why Grow Traditional Plants? .....	22
The Role of Nurseries in Ecosystem Restoration and Cultural Renewal .....	25
Challenge and Opportunity .....	28
References .....	28
<b>2. Planning A Tropical Nursery</b> .....	31
<i>Kim M. Wilkinson and Thomas D. Landis</i>	
The Importance of Planning .....	32
Defining the Nursery's Vision and Objectives .....	33
Determining Community Needs .....	33
Defining Target Plant Needs and Other Services .....	35
Assessing Resources and Costs .....	36
Selecting a Nursery Site .....	38
Planning the Flow of Work .....	40
Planning as an Ongoing Process .....	42
References .....	42
<b>3. Defining the Target Plant</b> .....	45
<i>Thomas D. Landis and Kim M. Wilkinson</i>	
Important Approaches for Implementing The Target Plant Concept .....	46
What Are the Outplanting Objectives? .....	48
What Are the Conditions of the Outplanting Site? .....	51
What Factors on the Project Site Could Limit Success? .....	53
How Will Limiting Factors be Mitigated? .....	53
What Species and Genetic Sources Will Meet Project Objectives? .....	56
What Types of Plant Materials (Stocktypes) are Best Suited to the Project Site and Objectives? .....	58
What Are the Best Outplanting Tools and Techniques? .....	62
What is the Best Time for Outplanting? .....	63
Learning and Adapting: Field Testing the Target Plant .....	63
References .....	64
Additional Reading .....	64
<b>4. Crop Planning: Propagation Protocols, Schedules, and Records</b> .....	67
<i>Kim M. Wilkinson and Douglass F. Jacobs</i>	
Developing Propagation Protocols .....	69
Developing Growing Schedules .....	72
Propagule Collection, Processing, and Treatment .....	72
Crop Growth Phases .....	73

# CONTENTS (continued)

Developing Facilities Schedules . . . . .	75
Keeping Written Records Makes Planning Easier . . . . .	78
References . . . . .	83
Additional Reading . . . . .	83
Appendices . . . . .	84

## Developing Your Nursery

<b>5. Propagation Environments . . . . .</b>	<b>89</b>
<i>Douglass F. Jacobs, Thomas D. Landis, Tara Luna, and Diane L. Haase</i>	
Matching Propagation Environments to the Site . . . . .	90
The Challenge of Growing Many Species and Stocktypes . . . . .	90
Minimally Controlled Propagation Environments . . . . .	91
Semicontrolled Propagation Environments . . . . .	91
Fully Controlled Propagation Environments . . . . .	93
Specialized Rooting Propagation Environments . . . . .	95
Modifying Light and Temperature in Propagation Environments . . . . .	97
Equipment Maintenance . . . . .	99
References . . . . .	99
Additional Reading . . . . .	99
<b>6. Growing Media . . . . .</b>	<b>101</b>
<i>Thomas D. Landis, Douglass F. Jacobs, Kim M. Wilkinson, and Tara Luna</i>	
Functions of Growing Media . . . . .	102
Physical Properties of Growing Media . . . . .	103
Chemical Properties of Growing Media . . . . .	104
Biological Properties of Growing Media . . . . .	105
Growing Media Ingredients . . . . .	105
Developing a Growing Medium . . . . .	112
Treatment of Growing Media Ingredients . . . . .	115
Mixing Growing Media . . . . .	117
Safety Considerations . . . . .	118
Testing Growing Media . . . . .	118
References . . . . .	120
Additional Reading . . . . .	121
<b>7. Containers . . . . .</b>	<b>123</b>
<i>Thomas D. Landis, Tara Luna, and R. Kasten Dumroese</i>	
Container Characteristics Affecting Plant Development . . . . .	124
Economic and Operational Factors Affecting Container Choice . . . . .	128
Types of Containers . . . . .	129

# CONTENTS (continued)

Cleaning Reusable Containers .....	137
References .....	138
Additional Reading .....	138
<b>Plant Propagation</b>	
<b>8. Collecting, Processing, and Storing Seeds .....</b>	<b>141</b>
<i>Tara Luna and Kim M. Wilkinson</i>	
Understanding Genetic Diversity and Seed Collection Ethics .....	142
Understanding Flowers and Seeds .....	144
Collecting Seeds .....	148
Processing Seeds .....	152
Seed Testing .....	156
Storing Seeds .....	158
References .....	160
Additional Reading .....	161
<b>9. Seed Germination and Sowing Options .....</b>	<b>163</b>
<i>Tara Luna, Kim M. Wilkinson, and R. Kasten Dumroese</i>	
Seed Characteristics .....	164
Treatments to Overcome Seed Dormancy and Enhance Germination .....	165
Environmental Factors Influencing Germination .....	171
Seed Sowing Methods .....	173
Seed Coverings (Mulch) .....	178
Try Different Sowing Techniques and Keep Detailed Records .....	179
Larger Role of Nurseries in Conservation of Species .....	182
References .....	182
Additional Reading .....	183
<b>10. Vegetative Propagation .....</b>	<b>185</b>
<i>Tara Luna and Diane L. Haase</i>	
Comparing Vegetative to Seed Propagation .....	186
Cuttings .....	186
Selecting Cuttings From Mother Plants .....	189
Collecting, Transporting, and Storing Cuttings .....	191
Types of Rooting .....	192
Cutting Preparation .....	192
Striking, Monitoring, and Growing Cuttings .....	194
Other Methods of Vegetative Propagation .....	197
References .....	204

# CONTENTS (continued)

## Plant Care

<b>11. Water Quality and Irrigation</b> .....	207
<i>Thomas D. Landis and Kim M. Wilkinson</i>	
Sources of Irrigation Water .....	208
Water Quality .....	209
Water Treatments .....	212
Water Quantity .....	213
Factors Affecting Water Availability to Plants .....	214
Determining How Much to Irrigate .....	214
Fertigation .....	217
Determining When To Irrigate .....	218
Types of Irrigation Systems .....	219
Water Conservation and Managing Nursery Wastewater .....	228
References .....	229
<b>12. Plant Nutrition and Fertilization</b> .....	233
<i>Douglass F. Jacobs and Thomas D. Landis</i>	
Basic Principles of Plant Nutrition .....	234
Sources of Mineral Nutrients .....	236
Organic Fertilizers .....	238
Synthetic Fertilizers .....	240
Comparison of Organic Versus Synthetic Fertilizers .....	243
Fertilizer Application Rates and Methods .....	244
Determining When to Fertilize .....	246
Monitoring and Testing .....	248
Reducing the Environmental Effects of Fertilization .....	250
References .....	250
Additional Reading .....	250
<b>13. Beneficial Microorganisms</b> .....	253
<i>Kim M. Wilkinson and David P. Janos</i>	
The Importance of Beneficial Microorganisms in the Nursery .....	255
Nitrogen-Fixing Bacteria .....	256
Mycorrhizal Fungi .....	262
Other Beneficial Microorganisms .....	270
Acknowledgements .....	270
References .....	270
Additional Reading .....	271
<b>14. Problem Prevention and Holistic Pest Management</b> .....	273
<i>Thomas D. Landis, Tara Luna, R. Kasten Dumroese, and Kim M. Wilkinson</i>	
Nursery Diseases and Pests .....	275

# CONTENTS (continued)

Problem Prevention Through Cultural Measures . . . . .	276
Problem Detection and Diagnosis . . . . .	279
Problem Management . . . . .	282
Ongoing Process Evaluation . . . . .	289
Acknowledgment . . . . .	289
References . . . . .	289
Additional Reading . . . . .	290

## Hardening, Shipping, and Outplanting

<b>15. Hardening</b> . . . . .	293
<i>Douglass F. Jacobs, Thomas D. Landis, and Kim M. Wilkinson</i>	
The Importance of Hardening . . . . .	294
Objectives of the Hardening Phase . . . . .	295
Conditioning Plants for Outplanting . . . . .	296
References . . . . .	301
<b>16. Harvesting and Shipping</b> . . . . .	303
<i>Diane L. Haase, Thomas D. Landis, and Tara Luna</i>	
Scheduling the Harvesting Window . . . . .	304
Grading Plants for Outplanting . . . . .	305
Short-Term Storage . . . . .	306
Packing . . . . .	306
Shipping . . . . .	306
Handling . . . . .	308
References . . . . .	311
<b>17. Outplanting</b> . . . . .	313
<i>Diane L. Haase, Thomas D. Landis, and R. Kasten Dumroese</i>	
Review of the Target Plant Concept and Implications for Outplanting . . . . .	314
Site Preparation . . . . .	316
Onsite Inspection, Storage, and Handling . . . . .	319
Selecting Planting Spots . . . . .	320
Proper Planting Technique . . . . .	322
Treatments at the Time of Planting . . . . .	328
Monitoring Planting Quality . . . . .	331
Monitoring Outplanting Performance . . . . .	332
Post-Planting Maintenance . . . . .	333
Long-Term Follow-up: Refining Target Plant Specifications . . . . .	334
References . . . . .	334
Additional Reading . . . . .	337

# CONTENTS (continued)

## Relationships, Management, and Learning

<b>18. Working With People</b> .....	339
<i>Kim M. Wilkinson</i>	
Interact Based on the Nursery Vision and Objectives .....	340
Working With Yourself .....	340
Working With Nursery Staff .....	341
Working With Clients .....	342
Working With the Community .....	348
References .....	349
<b>19. Nursery Management</b> .....	351
<i>Thomas D. Landis and Kim M. Wilkinson</i>	
Identifying Nursery Tasks .....	352
Planning and Scheduling .....	352
Daily Tasks and Observations .....	353
Recordkeeping .....	354
Crop Planning and Production Tasks .....	355
Seasonal Cleanup and Maintenance .....	356
Financial Management .....	356
Problem Solving .....	357
References .....	358
Nursey Management Checklist .....	359
<b>20. Discovering Ways to Improve Nursery Practices and Plant Quality</b> .....	361
<i>Kim M. Wilkinson and Diane L. Haase</i>	
The Importance of Trying New Things in the Nursery .....	362
Making Observations and Keeping Records .....	363
Step 1: Developing Ideas for Nursery Experiments .....	364
Step 2: Gathering Information .....	365
Step 3: Specifying a Question and Creating the Hypothesis .....	365
Step 4: Designing the Experiment .....	365
Step 5: Conducting the Experiment .....	367
Step 6: Making Observations and Collecting Data .....	368
Step 7: Assessing, Recording, and Sharing Results .....	371
Requesting Assistance When Needed .....	371
Field Testing to Refine the Target Plant .....	373
Beyond Experiments: Learning Through Reflective Practice .....	374
References .....	376
Additional Reading .....	376
